

**Thesis Title**

**Candidate Full Name**

Thesis to obtain the Master of Science Degree in

**Aerospace Engineering**

Supervisor(s): Professor Full Name 1 and Professor Full Name 2

**Examination Committee**

Chairperson:	Professor Full Name
Supervisor:	Professor Full Name 1 (or 2)
Member of the Committee:	Professor Full Name 3

**Month and Year**

Dedicated to someone special...

## **Acknowledgments**

A few words about the university, financial support, research advisor, dissertation readers, faculty or other professors, lab mates, other friends and family...

## Resumo

Inserir o resumo em Português aqui com o máximo de 250 palavras e acompanhado de 4 a 6 palavras-chave...

**Palavras-chave:** palavra-chave1, palavra-chave2,...

## **Abstract**

Insert your abstract here with a maximum of 250 words, followed by 4 to 6 keywords...

**Keywords:** keyword1, keyword2,...

# List of Tables

1.1	Table caption shown in TOC . . . . .	2
1.2	Aerodynamic coefficients. . . . .	2
1.3	Memory usage comparison (in MB). . . . .	2

# List of Figures

1.1	Schematic of some algorithm. . . . .	2
2.1	Caption for figure in TOC . . . . .	3
2.2	Aircrafts. . . . .	3

# Nomenclature

## Greek symbols

$\alpha$	Angle of attack.
$\beta$	Angle of side-slip.
$\kappa$	Thermal conductivity coefficient.
$\mu$	Molecular viscosity coefficient.
$\rho$	Density.

## Roman symbols

$C_D$	Coefficient of drag.
$C_L$	Coefficient of lift.
$C_M$	Coefficient of moment.
$p$	Pressure.
$\mathbf{u}$	Velocity vector.
$u, v, w$	Velocity Cartesian components.

## Subscripts

$\infty$	Free-stream condition.
$i, j, k$	Computational indexes.
$n$	Normal component.
$x, y, z$	Cartesian components.
ref	Reference condition.

## Superscripts

*	Adjoint.
T	Transpose.

# Glossary

- CFD** Computational Fluid Dynamics is a branch of fluid mechanics that uses numerical methods and algorithms to solve problems that involve fluid flows.
- CSM** Computational Structural Mechanics is a branch of structure mechanics that uses numerical methods and algorithms to perform the analysis of structures and its components.
- MDO** Multi-Disciplinary Optimization is an engineering technique that uses optimization methods to solve design problems incorporating two or more disciplines.

# Chapter 1

## Introduction

Insert your chapter material here...

### 1.1 Motivation

Relevance of the subject...

### 1.2 State-of-the-art

Insert your section material with the appropriate citations. These can be cited in the following way:

Citation mode #1 - Jameson et al. [1998]

Citation mode #2 - Jameson et al. [1998]

Citation mode #3 - [Jameson et al., 1998]

Citation mode #4 - Jameson, Pierce, and Martinelli [1998]

Citation mode #5 - [Jameson, Pierce, and Martinelli, 1998]

Citation mode #6 - Jameson et al. 1998

Citation mode #7 - Jameson et al., 1998

Citation mode #8 - Jameson et al.

Citation mode #9 - 1998

Citation mode #10 - [1998]

Several citations can be made simultaneously as Nocedal and Wright [2006], Marta et al. [2007].

The style can be changed from numerical citation order to authors' last name with option `\usepackage[numbers]{natbib}` in file `Thesis_Preamble.tex`.

## 1.2.1 Tables

Insert your subsection material and for instance a few tables...

item 1	item 2
item 3	item 4

Table 1.1: Table caption

Make reference to Table 1.1.

Model	$C_L$	$C_D$	$C_{My}$
Euler	0.083	0.021	-0.110
Navier–Stokes	0.078	0.023	-0.101

Table 1.2: Aerodynamic coefficients.

Here is an example of a table with merging columns:

	Virtual memory [MB]	
	Euler	Navier–Stokes
Wing only	1,000	2,000
Aircraft	5,000	10,000
(ratio)	5.0×	5.0×

Table 1.3: Memory usage comparison (in MB).

## 1.2.2 Drawings

Insert your subsection material and for instance a few drawings...

The schematic illustrated in Fig. 1.1 can represent some sort of algorithm.

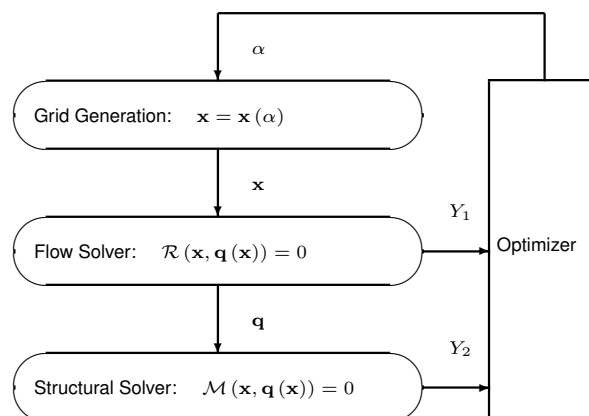

Figure 1.1: Schematic of some algorithm.

# Chapter 2

## Results

Insert your chapter material here, much like in 1

### 2.1 Figures

Insert your section material and possibly a few figures...

Figure 2.1: Caption for figure.

Make reference to Figure 2.1.

(a) Airbus A320

(b) Bombardier CRJ200

Figure 2.2: Aircrafts.

By default, the supported file types are *.png, .pdf, .jpg, .mps, .jpeg, .PNG, .PDF, .JPG, .JPEG*.

See [http://mactex-wiki.tug.org/wiki/index.php/Graphics\\_inclusion](http://mactex-wiki.tug.org/wiki/index.php/Graphics_inclusion) for adding support to other extensions.

## 2.2 Equations

Equations can be inserted in different ways.

The simplest way is in a separate line like this

$$\frac{dq_{ijk}}{dt} + \mathcal{R}_{ijk}(\mathbf{q}) = 0. \quad (2.1)$$

If the equation is to be embedded in the text. One can do it like this  $\partial\mathcal{R}/\partial\mathbf{q} = 0$ .

It may also be split in different lines like this

$$\begin{array}{ll} \text{Minimize} & Y(\alpha, \mathbf{q}(\alpha)) \\ \text{w.r.t.} & \alpha, \\ \text{subject to} & \mathcal{R}(\alpha, \mathbf{q}(\alpha)) = 0 \\ & C(\alpha, \mathbf{q}(\alpha)) = 0. \end{array} \quad (2.2)$$

It is also possible to use subequations. Equations 2.3a, 2.3b and 2.3c form the Navier–Stokes equations 2.3.

$$\frac{\partial \rho}{\partial t} + \frac{\partial}{\partial x_j} (\rho u_j) = 0, \quad (2.3a)$$

$$\frac{\partial}{\partial t} (\rho u_i) + \frac{\partial}{\partial x_j} (\rho u_i u_j + p \delta_{ij} - \tau_{ji}) = 0, \quad i = 1, 2, 3, \quad (2.3b)$$

$$\frac{\partial}{\partial t} (\rho E) + \frac{\partial}{\partial x_j} (\rho E u_j + p u_j - u_i \tau_{ij} + q_j) = 0. \quad (2.3c)$$

## **Chapter 3**

# **Conclusions**

Insert your chapter material here...

### **3.1 Achievements**

The major achievements of the present work...

### **3.2 Future Work**

A few ideas for future work...

# Appendix A

## Vector calculus

In case an appendix is deemed necessary, the document cannot exceed a total of 100 pages...

Some definitions and vector identities are listed in the section below.

### A.1 Vector identities

$$\nabla \times (\nabla \phi) = 0 \tag{A.1}$$

$$\nabla \cdot (\nabla \times \mathbf{u}) = 0 \tag{A.2}$$
